

Services on Norfolk Island have developed to suit our own unique situations.

I believe the services provided are far superior to the "Australian average" because they include the peoples compassion and sense of community, rather than the "Australian average" with a dollar & cent value.

Given the opportunity, Norfolk Island has the ability to raise its own revenue for our own set of services.

"Governance from Afar" will only see money wasted on Projects not wanted or required by the Norfolk Island Community.

Peter Horrocks
Norfolk Island.
