

## **OTHER USER CHARGES NEC — ASSESSMENT RESULTS**

---

- 1 This working paper describes the assessment for other user charges nec and provides information on its impact on the distribution of GST revenue and health care grants (GST pool) for the 2008 Update. The development of the assessment method is discussed in Volume 3 of the 2004 Review working papers.

### **DESCRIPTION OF THE CATEGORY**

- 2 The user charges nec category comprised all user charges other than those which:
- were differentially assessed. These were hospital patient fees, law and order fees and fines, property titles, housing user charges, public safety user charges, national parks and wildlife services user charges, and general public service user charges;
  - were too small to warrant separate identification. In particular, those associated with non-government primary school education, non-government secondary school education, higher education, transport of rural school children, and services to indigenous communities. These user charges were netted off the expenses for the relevant category and their assessment was made on a net basis; and
  - did not conceptually exist. There were no user charges associated with the first home owners scheme, administration of justice<sup>1</sup>, electricity and gas, water sanitation and protection of the environment, urban transit, non-urban transport, petroleum products subsidies, alcohol products subsidies, superannuation, GST administration, debt charges and depreciation.
- 3 Table 1 shows average expenses for the last six financial years. In 2006-07, the category average expense of \$298.92 per capita represented 41.98 per cent of total average user charges.

---

<sup>1</sup> Administration of justice user charges are assessed as fees and fines and property titles.

## ASSESSMENT METHOD

### Description of the assessment

4 Other user charges nec was assessed on an equal per capita<sup>2</sup> (EPC) basis.

### Assessment structure

5 Table 2 summarises the assessment structure for 2008 Update.

**Table 2 Other user charges nec, assessment structure, 2008 Update**

Component	Component weight	Factors	Basis of calculation
	%		
User charges	100	None	EPC

## CALCULATING THE CATEGORY FACTOR

6 The category factor is one for each State.

## RESULTS FOR 2006-07

7 Table 3 shows actual, average and assessed user charges per capita and the assessed revenue raising capacity ratios for 2006-07.

<sup>2</sup> In an equal per capita assessment, each State's revenue or expenses are set to the Australian average per capita amount. This method is used when differences between the States in providing services or raising revenue reflect differences in State policies. Such as assessment means that no needs are assessed for any State and that there is no impact on the relativities.

### CONTRIBUTION TO GST REVENUE DISTRIBUTION

10 Assessment of this category has no impact on the distribution of GST pool.

### CHANGES SINCE THE 2007 UPDATE

#### Effect of assessment on the distribution of GST revenue

11 There was no impact on the distribution of GST pool since the 2007 Update.
